

closeWebApiSession

It's a good practice to close a WebApiSession previously created with [createWebApiSession](#).

This releases all resources on the Server.

API version

1.0

Parameter

Name	Type	Since version	Required	Value(s)
apisid	string	7.4	yes	Session-ID returned from createWebApiSession .

Result

mime type	application/json
content	Session token to identify the authorized session
http status codes	<ul style="list-style-type: none">• 200 OK• 400 Bad Request• 403 Forbidden• 404 Not Found• 500 Internal Server Error• 501 Not implemented

Result:JSON

Name	Type	Since version	Value
apisid	string	7.4	Session-ID returned from createWebApiSession
